

## **AYER'S LAKE (Millville area)**

**Distance:** From the parking spot, up the steep gravel road to the summit and return is 3 km.

**Difficulty:** moderate, but steep.

**On a clear day, you can look down across Ayer's lake and see Mount Katahdin 128 km away to the south west.**

### **CAUTION:**

**Some of the trails are overgrown and very poorly marked.**

**If you intend to walk the trails, bring a map, compass, and have sufficient daylight.**

**The gravel road to the top is VERY steep and not suitable for cars.**

### **GETTING THERE:**

From Millville travel 3 km north-east to Hawkins Corner. Continue following Route 104 by turning right at Hawkins Corner. After 9.8 km, look for a gravel road on the left with the sign for Ayers Lake Unique Area. (46° 12.698'N 67° 16.689'W)

Follow the gravel road for 2.3 km to a road on your right. (46° 12.536'N 67° 18.492'W)

You can park here on the right, and hike up the steep gravel road to look-off. (46° 12.178'N 67° 18.868'W)

Depending on the severity of washouts, a 4 wheel drive vehicle, may be able to drive right up to the peak.

### **THE TRAILS:**

The quickest way to the summit is by way of the gravel road. At the top there is a picnic table near a log fence. There is also a Peak Access Trail that starts across from the parking spot at the bottom of the hill. This and other trails can be hard to follow, so be prepared.

## AYER'S LAKE TRAILS

Some trails lack signage and are poorly marked.  
If new to the area its best to park at the junction (2.3 km),  
( North ATV Trail 1.29 kms)

If hiking the trails, bring a map/compass/GPS and lots of daylight.

\*from the look-off, look across the southern part of Ayer's Lake to  
see Mt Katahdin 128 km away to the south west.
