

How to make a slideshow with Microsoft Photos app

First create a folder, and copy your photos to it.

Number the photos in the order you want them displayed.

1. Type "Microsoft Photos" in the windows search box, then open the app.
2. Select "video project" tab at the top.
3. Select "new Video project"
4. Name your video > ok
5. In the Project Library window, select ADD, then browse to your folder > Ctl+All > open to add the photos to the Project Library.
6. Create a Title Page: Add Title Card > Text (type message, choose font) > Background (choose color)
7. Now drag pictures down to the story board.
(Options): Order: drag to change order.
*these next settings are individual to each picture.
Duration: 1 – 7 seconds
Text: a message will appear on the picture.*you can change position and style
Motion: make picture zoom in, out, pan, etc,
3D: add things like falling leaves.
Filter: color changes
8. Create an end page: Add Title Card > Text (type message, choose font) > Background (choose color)
- 9.
10. Sound: at top right, choose "Background Music (canned music), or "Custom Audio" (choose your own)
11. You can play video at any time using the controls.
12. When ready, choose "Finish Video" tab at the top right.
13. This video can be played or imported into Facebook.
